

Suttle Stone Quarries

Customer: West Quay 2
Material: Limestone Boulders

Overview:

Beautiful boulders from Swanworth Quarry were delivered to Southampton for use at the West Quay 2 development.

The half-tonne limestone boulders were put in place by our Hiab on the perimeter of grassland next to the new extension in August 2017 and were added as verge protection and to stop vehicles accessing the green.

Testimonials:

Suttle Stone Quarries sales manager, Dave Penney, said: "They were recommended our stone by another client and were really happy with the materials. The stone exceeded their expectations, so they ordered more stone as decorative pieces elsewhere."
